

QuickBooks Online Integration

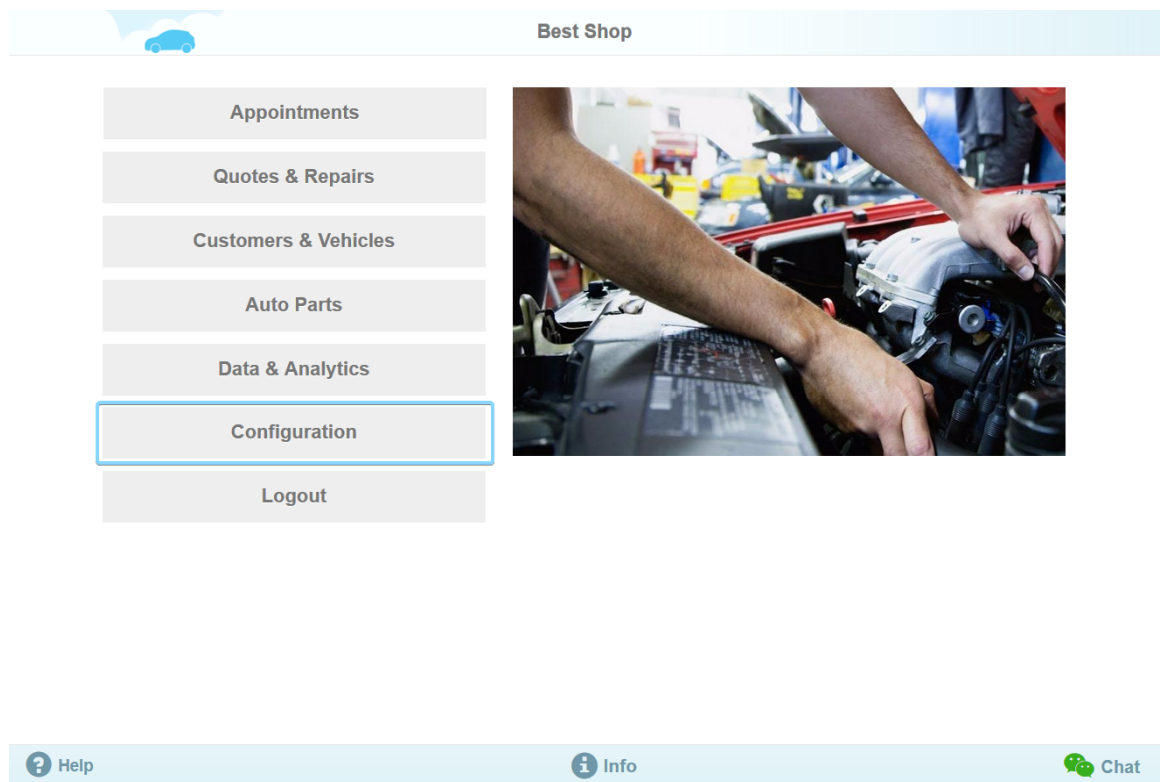

This guide will teach you how to link QuickBooks Online account to your repair shop in AutoRepair Cloud and how to set up synchronization.

AutoRepair Cloud allows you to export data into QuickBooks and Quicken accounting software. You may learn more about this feature in our [guides](#).

We are glad to inform you that QuickBooks Online has been added to the list of supported accounting software in AutoRepair Cloud. This will allow you to keep record of your business even easier.

A few easy steps will help you to do this.

- First, if you have not done this yet, you would need to register your account at <https://quickbooks.intuit.com/>.
- Then, go to your Repair Shop at autorepaircloud.com. Choose Financial in Configuration menu, and then click QB Syncing.

- Now, link the QBO account to your Repair Shop. Click Run Setup. You will see a pop-up window. If your browser blocks pop-up windows, you will receive an error message. To solve this issue (for Google Chrome), click the blocked window icon in the upper right corner of your browser, then choose “Always allow pop-ups from <https://autorepaircloud.com>” and press “Done”.

Firefox prevented this site from opening a pop-up window.

Configuration

Warning

Please disable your pop-up blocker and click the "Open" link again.

Congratulations! You have successfully synchronized your Repair Shop data with Quick Books Online. For even greater comfort, you can enable auto synchronization from once a day to twice a week.

Switch to your QBO account and see that all your Invoice data is available for work.

If you do not have enough experience with this accounting software, we recommend that you watch video guides at the [official QuickBooks Channel](#). At these video guides will demonstrate how to perform accounting work easier and more effective.
